

Specifications

Designed to prevent the backflow of high pressure gases, specifically corrosive, toxic and high purity (up to grade 6.0) gases. This high pressure Non-Return Valve is ideal for fitting into gas control panels and manifold systems.

Product Features

- Optional seals available to suit gas type.
- Laser marked with pressure service and direction of flow.
- All Chem-Master products are clean room assembled and undergo 100% Helium leak testing
- Designed and manufactured in Norfolk, UK.

Technical Data

Pressure Service	maximum 300 bar
Cracking pressure	0.20 bar

Materials:	
Body	316L Stainless steel
Seat	EPDM or Viton
Inlet Port	1/4 NPT Male
Outlet Port	1/4 NPT Male
Helium Leak Integrity	1x10 ⁻⁹ mbar l/s

Dimensions:	Length	55mm
	Diameter	18mm

Weight	0.07 kg
