

Specifications

Designed specifically for the control of high pressure high purity (up to grade 5.0) gases, the Lab-Master Isolation Valve offers precise control of the gas flow.

Available for 0 - 300 bar pressure range, this valve is ideally suited to both high pressure cylinder applications and low pressure pipeline applications found in laboratories, research and design, analytical facilities and many industries.

Product Features

- Four Port Configuration
- Maintenance free design
- Precise control of gas flow
- Tested for high pressure oxygen use
- Designed and manufactured in Norfolk, UK.

Technical Data

Pressure Service	0 - 300 bar
Materials:	
Body	Nickel plated brass
Valve seat	Nylon
Seals	EPDM
Inlet Port	3 x 1/4 NPT Female
Outlet Port	1 x 1/4 NPT Female
Weight	0.45kg

LIT01052 Issue: A Revision: 1
