

Specifications

Gas-Arc Argon/CO² heaters are designed to fit directly to the gas cylinder and work by preheating the gas before it enters the regulator which reduces the occurrence of freezing.

Product Features

- CE approved and marked.
- Incorporated temperature monitoring prevents the overheating of the preheater, when it is in permanent use and guarantees a safe operation.
- Can be connected directly to the cylinder as well as incorporated in manifolds or piping systems

Technical Data

Maximum Inlet Pressure:	up to 300 bar
Output:	200 watt
Power Supply:	230 V AC 200W 50Hz
Inlet Connection:	BS341 No.3 male or BS341 No.30 female
Outlet Connection:	BS341 No.3 female or BS341 No.30 male
Temperature Range:	-20°C to +60°C
Dimensions:	Length 150mm Height 90mm Diameter 90mm
Weight:	2Kgs
Enclosure Rating:	IP65
