

Specifications

The Gas-Arc Visual and audible alarm panels are designed to provide a remote user with warning of a gas cylinder or bank of cylinders being exhausted.

The alarm panels are capable of housing up to five different gas channels with each individual channel having an indicator light showing normal, reserve and low pressure status with an additional audible warning.

Product Features

- Dual voltage with selection of 110 or 240 volt by means of a switch.
- Additional facility of a volt free relay for wiring to slave panel or Building Management System (BMS)
- Additional snap-in gas channels to offer the user the convenience of being able to increase the number of channels (up to a maximum of 5) at a later date.
- For fuel gas systems, the installation of an intrinsically safe barrier is required to comply with B.A.S.E.E.F.A. requirements.
- CE Marked.

Technical Data

Type:	1 to 5 Channel
Maximum Voltage	240 V
Temperature range:	-20° C to +60° C
Weight:	1.1 Kg
